Dear Sir:

Upon receipt of the Notice of Allowance and upon review of this case, it was discovered that the document set forth on the enclosed Form PTO/SB/08a/b, which was originally submitted with an Information Disclosure Statement, dated August 2, 2001, was not considered by the Examiner because an English language translation was not provided. A copy of the document and an English abstract are enclosed herewith. It is understood that the Office is under no obligation to consider the document at this time; however, to complete the record it is submitted.

While applicants believe that the document is in no way destructive of patentability of the allowed claims, in the interest of completeness, it is submitted herewith. Specifically, the abstract for the cited document, DE 197 40 092 A1 discusses the use of liposomes as a delivery

vehicle for gene therapy of skin cells, including keratocytes from hair follicles. The translation provided does not teach or suggest a method to introduce a nucleic acid molecule into a mammalian subject comprising transplanting into the dermis of said subject at least one hair follicle that has been modified ex vivo to contain the nucleic acid molecule. As such, we do not consider this reference as anticipatory or rendering the claimed invention obvious.

Dated: February 10, 2006

Respectfully submitted,

By
